2026

FRC team 8757 – GEODEBOTS ended the season with a tremendous sign of growth and maturity. We would like to thank our donors, sponsors, mentors, coaches and most of all our parents for signing us up at the Nehemiah Center to compete in robotics. We all learned so much from each other - how to resolve conflicts, design, innovate, problem solving, strategizing, troubleshooting code AND especially – **GRACIOUS PROFESSIONALISM**. It really is MORE THAN ROBOTS!

A “BIG” shoutout to all our 2026 sponsors: FIRSTNC / BAE Systems / PPG Foundation / TE Connectivity / FORGE Greensboro / CCI Machine Shop / Columbia Forest Products & MHI (Mitsubishi Heavy Industries) – who awarded us funding to attend the state championship.

The Geodebots objective over the next 30 days is to raise funding to implement the Triad’s STEM Innovation Hub which will include a full-size FRC practice field in Guilford County. Our goal is to raise \$100,000 for rental space, field materials and supplies annually. FIRSTNC’s corporate office is in Greensboro, and the state championship will be held here for the next couple of years. To practice for competition, our team and area teams must travel 30 minutes to Winston-Salem. We appreciate the use of their field but realize the importance of establishing a field right here in Greensboro. This would serve not just FRC teams, but also FLL and FTC practices and scrimmages. Allowing high school students to mentor our younger students in robotic exploration.

Consider becoming an annual corporate sponsor today as the GEOEBOTS get ready to implement this much-needed initiative. Thereby creating even more impact on STEM & Robotics in the communities we serve. Enabling our team and area teams: Triple Strange, HotBotz, EagleTron and newly formed teams to have a full-size field readily available to prepare for future competitions.

In exchange for your support, we offer several high-visibility branding opportunities,

FRIEND LEVEL \$2,500 annual contribution (40 companies committed to giving). This includes:

- Company logo is prominently displayed on our competition robot.
- Recognition on our team t-shirts, worn at live tournaments attended by thousands.

CHAMPION LEVEL \$5,000 annual contribution (20 companies committed to giving). This includes:

- All of the above PLUS
- Company name on our donor wall at our corporate facility.
- Featured placement on our team website and social media platforms.

Kindly SCAN this QR code to donate today. Your contribution is truly changing and impacting the lives of so many youth, teens and young adults every day. We are finding that hidden gem/talent and developing a more tech-ready workforce by providing equal access to these lucrative fields.

We gladly accept all size donations/contributions. Thank you so much for your support. Edgar, Team Captain FRC8757 - 9th grader at Smith HS
